Descrizione / Description - Description

Da un'unica fusione ad altissime temperature di 1.250 °C, prende vita questo straordinario materiale ceramico brevettato **Plus+ton®** qualificato come totalmente riciclabile e quindi 100% ecologico, capace di sostituire quei prodotti realizzati con resine, solventi e catalizzatori.

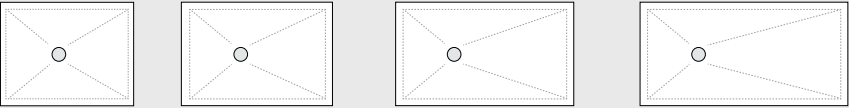

From a single fusion at very high temperatures of 1,250 °C, this extraordinary patented **Plus+ton®** ceramic material comes to life, qualified as totally recyclable and therefore 100% ecological, capable of replacing those products made with resins, solvents and catalysts.

D'une seule fusion à très haute température de 1.250 °C naît cet extraordinaire matériau céramique breveté **Plus+ton®**, qualifié de totalement recyclable et donc 100% écologique, capable de remplacer les produits à base de résines, solvants et catalyseurs.
